

High nit outdoor housing

092.1700-xx IP55 High nit flat panel outdoor housing for landscape/portrait .. inch monitor

For protection of your monitor SmartMetals supplies a complete line of monitor housings for in- as well as outdoor use. The housings are standard equipped with a hinging front and hardened safety glass in an extra clear quality. The housings for outdoor use are fitted with active ventilation, thermostatically controlled heating elements and a dust filter. A wall mount and VESA mount for the monitor are standard supplied. The standard colour of the housing is white with a black frame around the monitor; white for the monitor to protect from external heat, black for the frame for contrast. Other colours are available on request. The enclosures are available for portrait as well as landscape position and are produced according to the IP55 norm. The 092.1500 & 092.1600 series are suitable for monitors till 700cd and a max. depth of 80 mm, the 092.1700 are suited for the high brightness monitors up to 2500cd and a max. depth of 140 mm. Due to the several variations in high brightness, these 092.1700 housings are exclusively custom-built. Describe your brand and model of monitor in the description of your quote enquiry.
