

## VideoWall - Wall bracket

### 172.0080 EOL | VideoWall - Wall bracket

This L bracket is required to mount the aluminium VideoWall profiles to the wall. Both the horizontal as the vertical plane are featured with a slotted hole of 10 mm. With these holes unevenness in the wall can be corrected for creating a perfect flat mounting surface for your VideoWall; adjustment in depth as well as in height. Due to its design and strength we have been able to keep the number of wall brackets (and automatically holes requiring to be drilled in the wall) to a minimum. As standard, at a sufficiently solid wall, we employ the number of displays plus one, for the number of required L-brackets.
